

I respectfully urge the FCC to reject NAB's petition 04-160. I've been a subscriber to XM satellite radio about a year now. It has been a valuable tool of information and entertainment. Please don't be an instrument toward trashing our constitutional rights under the first amendment. Please give the satellite radio industry the freedom and right to grow their technology and engage in fair competition with the broadcasting industry. Afterall its the American way. Thank you very much....Brad Hague
